

exposed concrete monument preservation and restoration

Lissabon, April 2025 MARTIN BERGER (BECONART)

exposed concrete post-processing

3 main points:

1. New construction: contractual target of exposed concrete quality = surface design
2. Renovation: repair + surface design
3. Monument protection: renovation & preservation as original

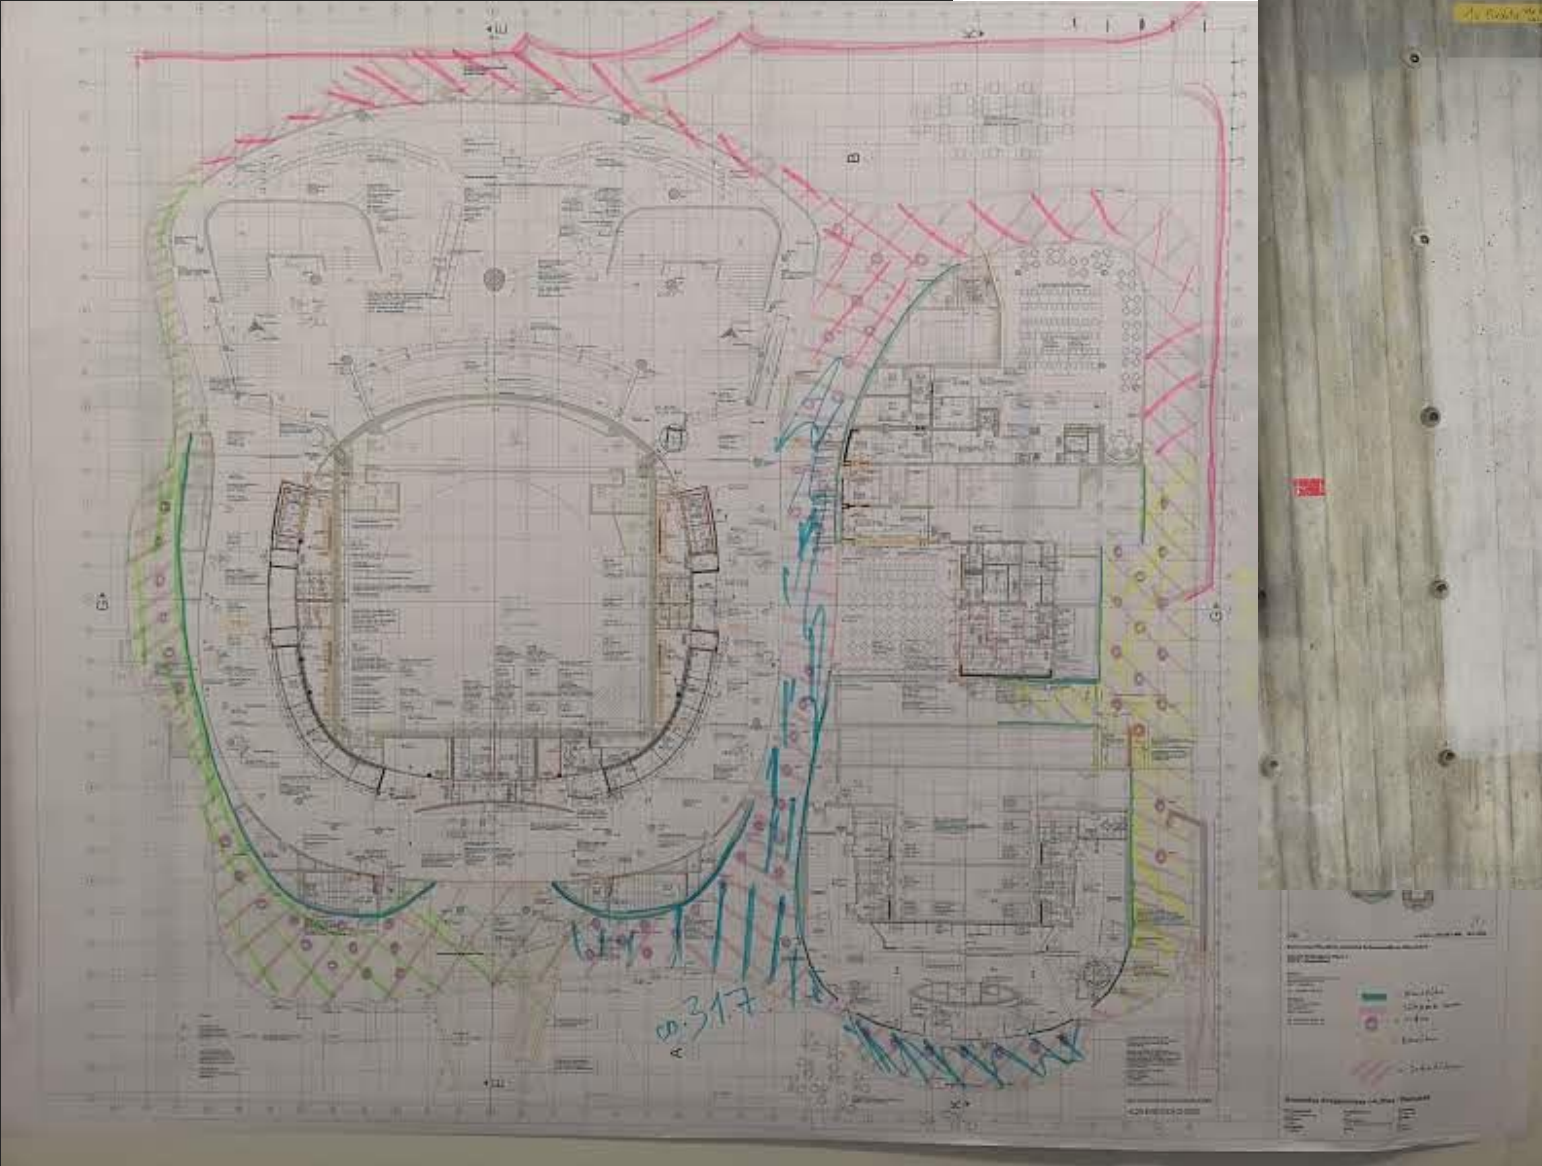

- Cultural monument Schauspielhaus Düsseldorf
- Repair, cleaning & redesign like in the 1960's
- architect Bernhard Pfau/ Rest. Ingenhoven architects
- 2.500 m2 concrete wood structure

Restoration of a border tower from the time of the German division East West

Restoration of a border tower from the time of the German division East West

**We
make concrete visible
make exposed
concrete beautiful
everywhere and
sustainably**

- based on our expertise and 16 years of experience
- up to 40 employees
- Specialists from a broad spectrum: concrete builders, restorers, church painter and sculptors, stonemasons, and freelance artists

BEFORE

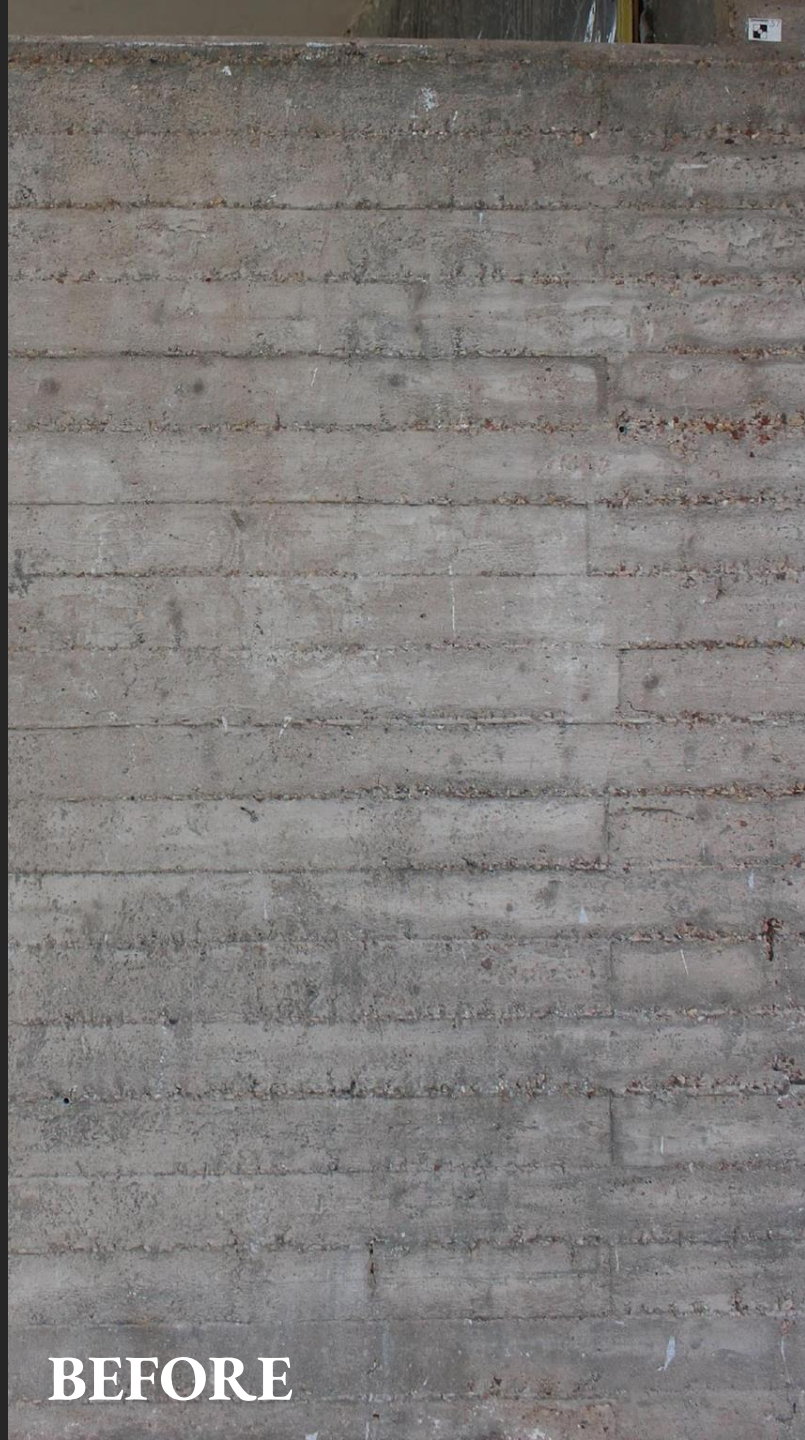

AFTERWARD

From small projects to large ones with over thousands of square meters, we work on:

- broken edges
- chamfers / formwork joints
- cable ducts
- anchor cones
- homogenisation with mineral colour
- broken out areas on cement paste
- large glazes
- pores/blowholes

BEFORE

AFTERWARD

Materials:

Remmers

MC Bauchemie

ARDEX

special mixes for the
project

Minral Colouring/
Design

KEIM

CONCRETAL®-FIXATIV

Concretal®-Lasur etc.

Work steps:

- Clean, remove loose parts
- If necessary, sanitize
- Fine filling/ modeling
- Equalize or structure
- Color homogenization
- Local retouch
- remineralization
- Protect (water/graffiti)
